## ADVANCED BEAUTY

Keeping your skin and body beautiful takes work, and every year new procedures are released to help you achieve your maximum beauty. Dr. Kenneth Beer is a specialist in esthetic, surgical and general dermatology with offices in West Palm Beach and Jupiter. Dr. Brian Hass, a board certified plastic surgeon, and Dr. Andrea Hass, a board certified ophthalmology and ophthalmic plastic surgeon, operate the Hass Plastic Surgery and MediSpa in Palm Beach Gardens.

Both offices have added the new injectable, Juvéderm XC with lidocaine, to their practices. "These have been wonderful because they numb the skin as they are injected and patient comfort is greatly increased," says Beer, who also offers the Restylane-L and Perlane-L with lidocaine injectable.

For acne, Beer is using the new Isolaz device, a laser skin therapy that helps purify and deep clean pores from the inside out. For everyday use, Beer's new fragrance-free skin-care line, Scientific, is available. Designed for all skin types, it features an exfoliator, daily hydrating cream, brightening and repair serums and pH balancing cleanser. (561-655-9055, 561-932-1707, palmbeachcosmetic.com)
